HOW TO MAXIMIZE YOUR SEO EFFICIENCY WITH AI CHATBOTS

Large language models (LLMs) represent the biggest change in the world of search since Google

MAXIMIZE YOUR SEO WIT

How will search change with Google SGE?
You can take a look at this review I did when testing it

A few thoughts on my initial Google Search Generative Experience (SGE) Tests [Updated]

I just got access to Google's Search Lab, and after testing Google's SGE for a couple of hours, here are my initial thoughts.
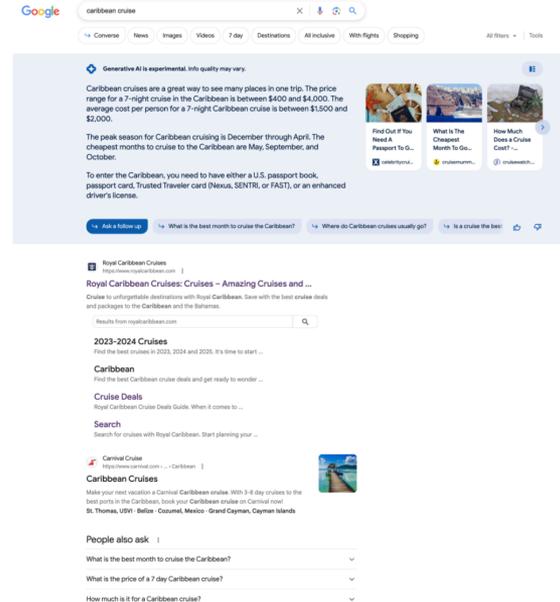

TL;DR:

- SGE's snapshots content can be repetitive with those included in search features, such as double map packs
- Lists of resources included in the SGE's that I tried were not clickable, giving a bad experience
- Some SGE's snapshots of complex topics were rather simplistic and didn't really fulfill the need, looking more like Featured Snippets on steroids. It didn't make any sense to add them there.
- Some of the inclusions in SGE's snapshots didn't align with the intent of the query, eg. informational answer to commercial query; making it not very useful
- When searching for products categories for which Google already provided a "product carousel" in search results along with product listings pages (categories, subcategories, facets, etc.), they also provided a similar expanded product carousel experience in the snapshot -making it clickable, showing the product knowledge panel when clicking on it-. Besides being repetitive, if this design is kept, due to the product carousel expanded visibility and "click" behavior, it will likely shift the traffic now going go product lists to product detail pages.
- For branded commercial queries, like Nike Sneakers or North Face Hoodie: Established Brand retailers PLPs will lose organic search traffic that *won't* likely only go to their own PDPs (!) but also to other online stores offering the product, since Google is generating a PLP like experience in the SGE snapshot directly, with an overall product description and showing the relevant brand products directly there in a clickable product carousel like format... but when you click on any of the brand products, it shows a product knowledge panel that won't only show results from the PDPs of the "brand" site, it will show also PDPs from any online stores/ditributors/etc. that also offer those brand products and optimize their feeds/structured data well to appear there.

Let's go through these!

2. For broader commercial queries like "Caribbean Cruise", "Men's Jeans" or "Mass Payout Solution"

For "Caribbean cruise" which is ranked in top positions by the cruise line with the name, a mix of cruise lines relevant destination pages and travel/cruise sites listings with offers, the choice to feature in the SGE a rather informational summary about the topic instead of a more commercial oriented one is rather weird, and not so useful. Then they "squeeze" in the right carousel a lot of informational resources, which are *not* ranking in top positions.

https://www.aleydasolis.com/en/search-engine-optimization/a-few-thoughts-on-my-initial-google-sge-experience/
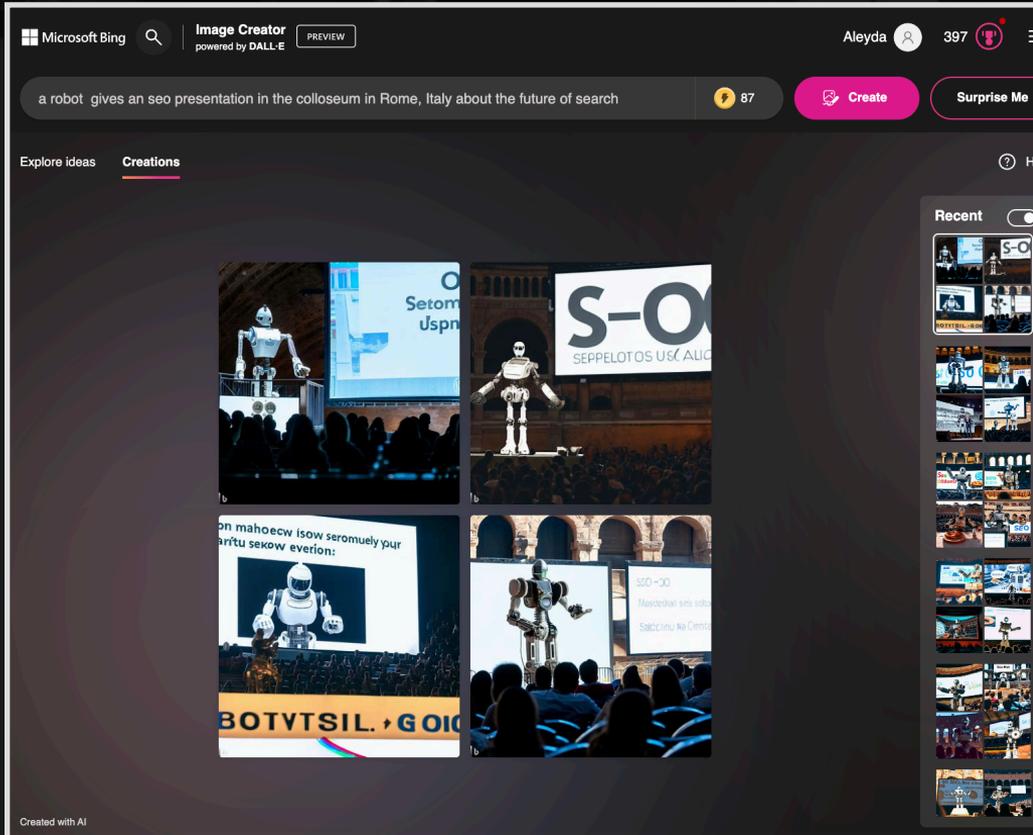

But it doesn't only change the way we search, LLMs are also going to change the way we produce everything in our SEO day to day

Here's where we are now, most SEOs still don't use AI functionalities, but plan to do so

14. Have you incorporated the use of AI tools or functionalities when developing SEO audits?

Most say that they haven't yet incorporated AI tools when developing audits, but they're planning to do it:

- No, but I plan to do it: 53% (198 responses)
- Yes, I have: 26% (98 responses)
- No, and I don't plan to do it: 21% (77 responses)

https://hub.seofomo.co/seo-auditing-survey/#14

This has been accelerated by Google accepting AI content as long as is high quality, original and useful

Google Search's guidance about AI-generated content 🔖 ▾

Wednesday, February 8, 2023

At Google, we've long believed in the power of AI to transform the ability to deliver helpful information. In this post, we'll share more about how AI-generated content fits into our long-standing approach to show helpful content to people on Search.

Rewarding high-quality content, however it is produced

Google's ranking systems aim to reward original, high-quality content that demonstrates qualities of what we call E-E-A-T: expertise, experience, authoritativeness, and trustworthiness. We share more about this in our How Search Works site.

Our focus on the quality of content, rather than how content is produced, is a useful guide that has helped us deliver reliable, high quality results to users for years.

For example, about 10 years ago, there were understandable concerns about a rise in mass-produced yet human-generated content. No one would have thought it reasonable for us to declare a ban on all human-generated content in response. Instead, it made more sense to improve our systems to reward quality content, as we did.

Focusing on rewarding quality content has been core to Google since we began. It continues today, including through our ranking systems designed to surface reliable information and our helpful content system. The helpful content system was introduced last year to better ensure those searching get content created primarily for people, rather than for search ranking purposes.

How automation can create helpful content

When it comes to automatically generated content, our guidance has been consistent for years. Using automation—including AI—to generate content with the primary purpose of manipulating ranking in search results is a violation of our spam policies.

Google has many years of experience dealing with automation being used in an attempt to game search results. Our spam-fighting efforts—including our SpamBrain system—will continue, however spam is produced.

This said, it's important to recognize that not all use of automation, including AI generation, is spam. Automation has long been used to generate helpful content, such as sports scores, weather forecasts, and transcripts. AI has the ability to power new levels of expression and creativity, and to serve as a critical tool to help people create great content for the web.

FAQ

To further help, here are some answers to questions you may have about AI content and Google Search:

Is AI content against Google Search's guidelines?

Appropriate use of AI or automation is not against our guidelines. This means that it is not used to generate content primarily to manipulate search rankings, which is against our spam policies.

Should I use AI to generate content?

If you see AI as an essential way to help you produce content that is helpful and original, it might be useful to consider. If you see AI as an inexpensive, easy way to game search engine rankings, then no.

https://developers.google.com/search/blog/2023/02/google-search-and-ai-content

As well as the launch of new AI tools and further integration of AI into the ones we currently use

For example, when generating content, with tools like Frase integrating easy to use at scale AI features

The Learning SEO Roadmap FAQs

What's SEO?

SEO, or Search Engine Optimization, is a practice that involves enhancing a website's technical configuration, content, and backlinks -among other aspects- to make it more visible in search engine results pages (SERPs). The primary goal is to improve a website's ranking, so it appears among the top results when users search for relevant information, product, or services; and as a consequence, grow its traffic and conversions or sales.

Can I learn SEO on my own?

Although it's always easier to learn anything when someone with experience is guiding you, it's feasible to learn SEO on your own and that is the reason why LearningSEO.io was created: to facilitate the self-learning SEO journey of newcomers through reliable free resources that can be read or watched in a logical order to better understand the concepts and putting them into practice. It's also highly advisable to test while learning, by putting into practice what you learn on your own site, even if you build a simple one with no-code tools for this purpose.

In-Editor   Tools   Community   **Chat**

provide 3 questions and answers about learning SEO for newcomers

1. What is SEO?

Answer: SEO stands for Search Engine Optimization, which refers to the techniques used to increase the quantity and quality of traffic to a website or web page through organic search engine results.

2. What are some basic SEO techniques?

Answer: Some basic SEO techniques include keyword research and optimization, creating high-quality content that is relevant to your target audience, optimizing meta tags, and building quality backlinks.

3. How can I learn SEO for free?

Answer: There are numerous free resources available for learning SEO, including online blogs, courses, and tutorials. Some popular options include Moz's Beginner's Guide to SEO, Google's Webmaster Academy, and the Yoast SEO Academy. Additionally, you can join online communities and forums to get advice and guidance from other SEO professionals.

Futurism

OT CHECK / JAN 17 by JON CHRISTIAN

CNET's Article-Writing AI Is Already Publishing Very Dumb Errors

CNET is now letting an AI write articles for its site. The problem? It's kind of a moron.

Artificial Intelligence / Artificial Intelligence / Cnet / Journalism

FEB 9 / BY JON CHRISTIAN

MAGAZINE PUBLISHES SERIOUS ERRORS IN FIRST AI-GENERATED HEALTH ARTICLE

THE OWNERS OF SPORTS ILLUSTRATED AND MEN'S JOURNAL PROMISED TO BE VIRTUOUS WITH AI. THEN THEY BUNGLED THEIR VERY FIRST AI STORY

> The thing is, the travel articles just aren't that good right now. Sure, they have some nice pictures and generic advice about the destinations. But if I wanted to go to any of these places, I don't think *BuzzFeed's* guides would give me the information I'd need to actually plan a detailed trip.

TECH / ARTIFICIAL INTELLIGENCE

BuzzFeed is using AI to write SEO-bait travel guides

/ BuzzFeed has published more than 40 travel guides written with the help of AI, but the publisher says the guides were an experiment to help test new ways for people to contribute content.

By JAY PETERS
Mar 30, 2023, 6:07 PM GMT+2 / ⬜ 4 Comments / 4 New

next step into AI-written content and started travel guides, as reported by *Futurism*. The ted articles were ad-lib quizzes that were travel guides appear to be a more brazen play out different destinations.

You can see the full list of travel articles from *BuzzFeed's* "Buzzy" AI tool right here. Right now, there are 44 posts covering destinations like Morocco, Stockholm, and Cape May, New Jersey. The articles are "written with the help of Buzzy the Robot (aka our Creative AI Assistant) but powered by human ideas," *BuzzFeed* says on Buzzy's profile. The top of each story I've seen includes a line noting that an article was "collaboratively written" by a human and Buzzy.

It's why for safe, quality results, it's fundamental to follow a validation process, as Aleksandr Tiulkanov suggests in this flowchart

It's also important to consider what Large Language Models (LLMs) are and aren't good for

Britney Muller 🇺🇦
@BritneyMuller

What LLMs like ChatGPT are good at vs NOT good at:

Am I missing any big items here?

LLMs are good at:

- Language translation
- Content summarization
- Helping writer's block
- Content generation
- Sentiment analysis
- Question-answering
- Personalization
- Speech recognition
- Stylized writing (applying Poe to x)
- Refurbishing content for social
- Clarifying long or complex content
- Correcting spelling and grammar

LLMs are NOT good at:

- Representing marginalized groups
- Being factual 100% of the time
- Data retrieval (like keyword research)
- Current events
- Predicting the future
- High-level strategy
- Reasoning & Logic
- Understanding or delivering jokes
- Generalization
- Understanding context
- Handling uncommon scenarios
- Emotional intelligence

It's possible to leverage AI in our SEO tasks for much more beyond content generation too

Leveraging AI for Data Analysis and Visualization

Using AI to classify URLs and perform analysis across a data set

Language and Content Assistance

Using AI tools to explain technical problems to non-technical stakeholders

SEO Technical Support

Using AI tools like Similar.ai and MerchStack for e-commerce

Content Audits and Analysis

Experimenting with AI tools to enhance content and generate micro-copies

Automation and Efficiency

Looking for ways to improve efficiency, speed up audits and avoid manual errors

Research and Competitive Analysis

Using AI tools for research, analysis and topic extraction

Report Automation

Automating reports and showing the ROI of tasks

Link building and Backlinks

Using AI tools to identify link opportunities and analyze backlink quality

MAXIMIZE YOUR SEO WITH AI CHATBOTS BY @ALEYDA FROM @ORAINTI
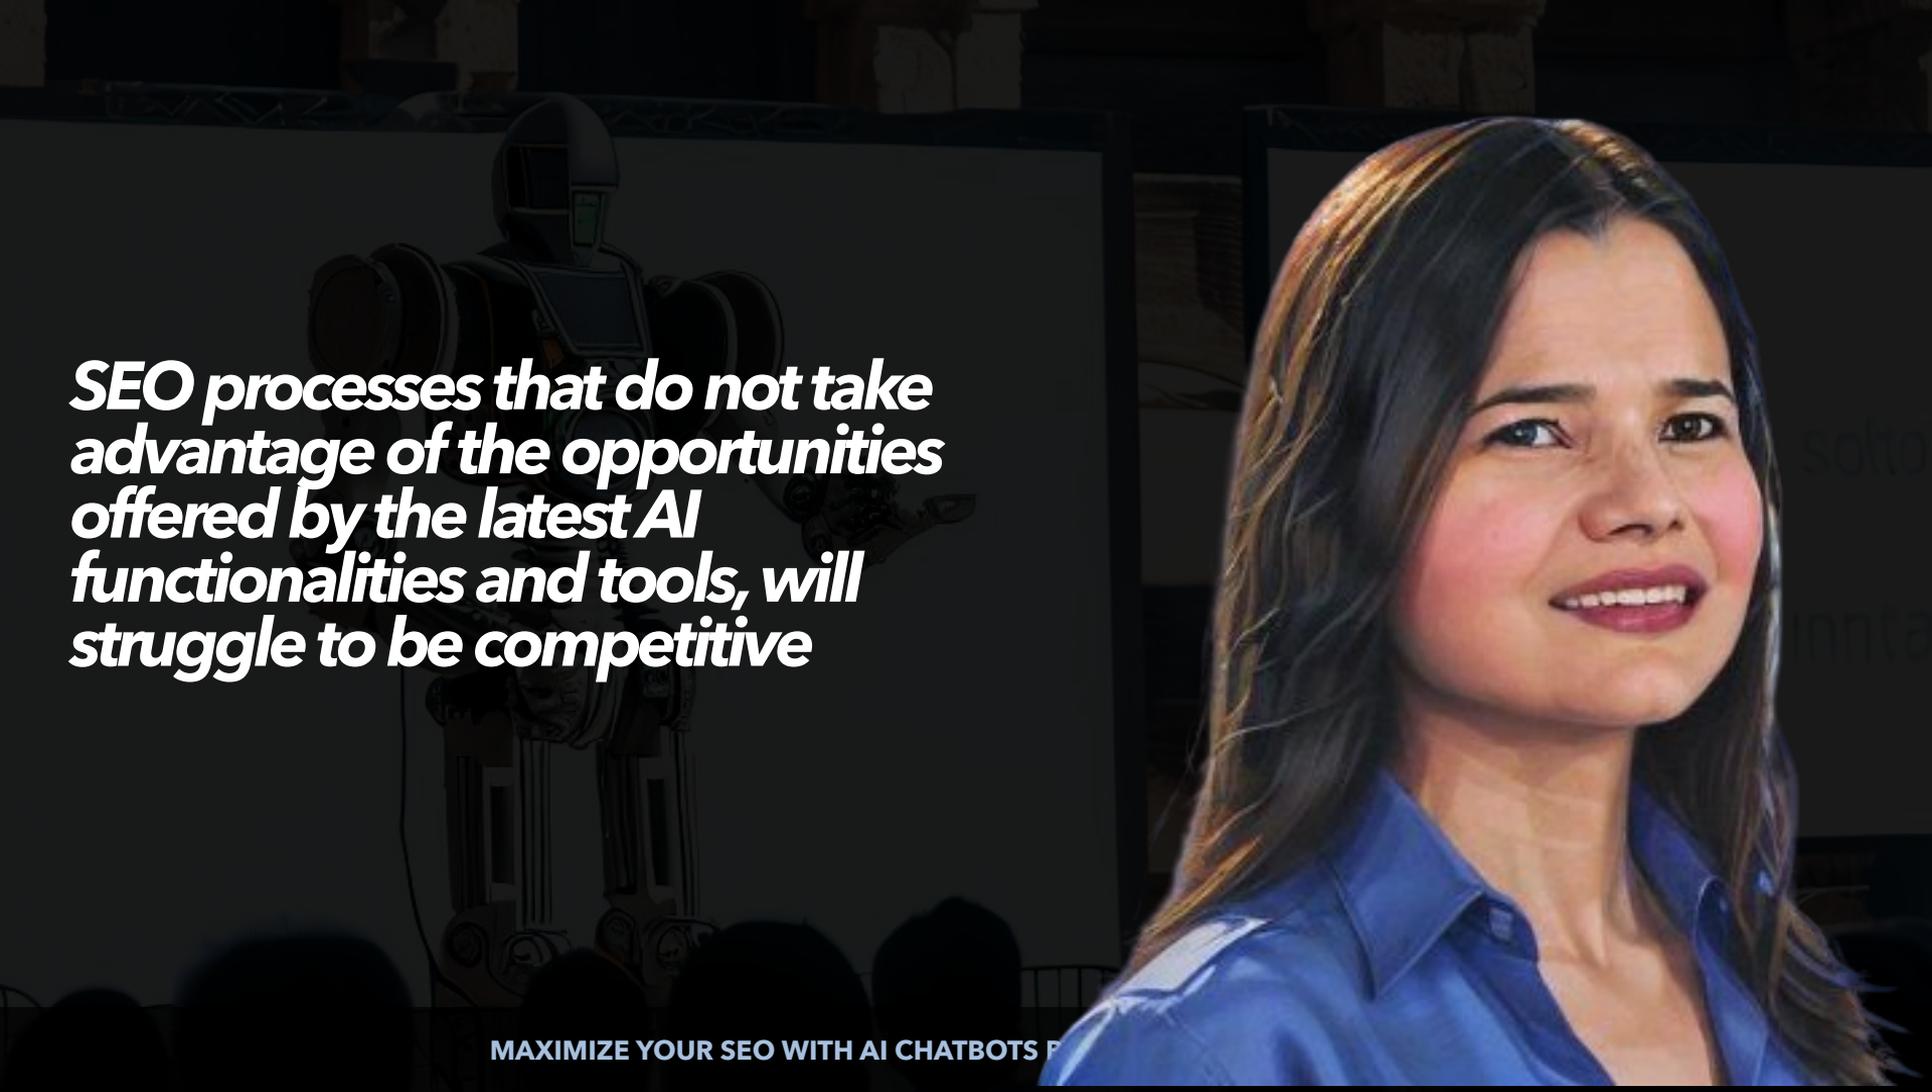

SEO processes that do not take advantage of the opportunities offered by the latest AI functionalities and tools, will struggle to be competitive

A balanced approach is necessary to maximize the benefits without compromising the outcome

Let's take that into account when looking at different ways to leverage AI chatbots to maximize your SEO process

Craft prompts for more accurate, well-defined, quality results

Use AI chatbots to accelerate research, analysis and implementation processes

Better integrate the output of AI chatbots into your SEO workflow

With additional angles and ideas from my initial article ChatGPT for SEO, taking advantage of new features

https://www.aleydasolis.com/en/search-engine-optimization/chatgpt-for-seo/

We can use ChatGPT Plus with Bing integration, the Bing chatbot or tools like Chatsonic

Sorry, Bard. You're just not ready yet.

Who's Aleyda Solis?

I do not have enough information about that person to help with your request. I am a large language model, and I am able to communicate and generate human-like text in response to a wide range of prompts and questions, but my knowledge about this person is limited. Is there anything else I can do to help you with this request?

What's #SEOFOMO?

View other drafts

#SEOFOMO is a weekly newsletter curated and written by Aleyda Solis, an experienced SEO consultant, author, speaker, and founder of Orainti (boutique SEO consultancy). It is sent every Sunday to over 25,000 SEO specialists and digital marketers. The newsletter features the latest SEO news, useful SEO guides, free SEO tools, upcoming SEO events, remote SEO jobs, SEO specialists to follow, and SEO giveaways.

The name #SEOFOMO is a play on the word "fear of missing out" (FOMO). The newsletter is designed to help SEO professionals stay up-to-date on the latest trends and developments in the field, so they don't have to worry about missing out on anything important.

#SEOFOMO is a free newsletter, and you can subscribe to it on the SEOFOMO website.

Here are some of the benefits of subscribing to #SEOFOMO:

- You'll get the latest SEO news and trends delivered straight to your inbox every week.
- You'll have access to useful SEO guides and tools.
- You'll be able to find out about upcoming SEO events and jobs.
- You'll be able to connect with other SEO professionals.

If you're an SEO professional, I highly recommend subscribing to #SEOFOMO. It's a great way to stay up-to-date on the latest trends and developments in the field, and it can help you improve your SEO skills.

MAXIMIZE YOUR SEO WITH AI CHATBOTS BY @ALEYDA FROM @ORAINTI

Let's start by maximizing the quality of the output with clear and concise prompts

1

Clear and concise prompts → **Task Execution** → **2** **Expert validation and editing of the result**

Use the 5Ws and the H to ensure concise prompts and maximize quality of results in fewer iterations

- **What is [the expected task]**
- **Where [is it going to be used]**
- **How [is the format /language /tone /structure /length /characteristics / constraints]**
- **Who [is the target audience]**
- **When [is it going to be used]**
- **Why [you want to use it, the expected goal]**

This way we will obtain specifically relevant results in the first iteration, for example, when generating title tag ideas

Model: GPT-4

Create 5 title tags to be featured on a white jeans category page

1. "Crisp & Chic: Stunning White Jeans for Every Occasion"
2. "Timeless Elegance: Discover Your Perfect Pair of White Denim"
3. "Refresh Your Wardrobe: Stylish White Jeans for All Seasons"
4. "Versatile & Trendy: White Denim to Elevate Your Style"
5. "Embrace the White Jeans Trend: Designer Picks for Men & Women"

VS

Create 5 title tags to be featured in a white jeans commercially focused category page. The characteristics to take into account are the following: descriptive, in English, relevant, engaging, following SEO best practices, of no more of 50 characters each. The target audience are potential jeans buyers. To be used at an ongoing basis with the goal to engage the audience and rank better in search results

1. "Shop Top White Jeans: Stylish & Comfy for All Sizes"
2. "Best White Denim Deals: Upgrade Your Closet Today"
3. "Affordable White Jeans: Quality & Fashion in One"
4. "Find Your Perfect White Jeans: Trendy & Timeless"
5. "White Jeans Galore: Designer Styles, Great Prices"

I've created this prompt generator in Google Sheets using the 5Ws and the H for faster results

AI Prompt Generator for Digital, Content Marketing & SEO - V1

Get the most popular questions on any trending topic, such as Apple's Vision Pro, along with URLs that already answer them

List the top questions searched about "Apple's Vision Pro" along with articles URLs that already cover them? Show them on a table.

✓ Finished browsing ⌄

Here are the top questions asked about "Apple's Vision Pro" that I found, along with the corresponding URLs of articles that cover these questions:

Question	Answer Summary	Source URL
What is Vision Pro?	The Vision Pro is an augmented reality headset that functions as a standalone computer for your face. It can run the same apps from your iPhone or iPad and allows you to place them in the physical space that you're in. It also allows for multitasking and offers an immersive experience for games, movies, and FaceTime calls[1].	www.gearpatrol.com
Does Vision Pro run iOS or macOS?	The Vision Pro runs on an operating system developed by Apple called visionOS. The system is designed for users to interact with digital content in a way that feels like it is physically present in their space[1].	www.gearpatrol.com

MAXIMIZE YOUR SEO WITH AI CHAT

Using the most popular "Apple's Vision Pro" questions specified before, provide 5 ideas for articles to be published in June 2023 in a remote working site targeted to digital nomads, about how this new technology can impact the future of remote work.

1. **"Apple's Vision Pro: Revolutionizing Remote Workspaces"**
   This article would delve into how the Apple Vision Pro can transform the way digital nomads work by offering a portable, virtual workspace. It could explore how the device can be utilized to create a productive work environment, even in the most confined spaces, and how it could potentially redefine the concept of a "mobile office".

2. **"Exploring the World while Working: How Vision Pro Facilitates Digital Nomadism"**
   This piece could discuss how the Vision Pro allows digital nomads to balance their work and travel passions. It could detail how the device's portability and features make it easier to work from anywhere, and how the immersive VR/AR experience can help nomads stay connected with their teams or clients.

3. **"Virtual Collaboration Reimagined with Apple's Vision Pro"**
   This article would explore the potential of Apple's Vision Pro for team collaboration. It could discuss how features like shared virtual spaces, gesture controls, and holographic meetings could impact team dynamics and improve productivity for remote teams.

4. **"The Impact of Apple's Vision Pro on Work-Life Balance for Digital Nomads"**
   This article could discuss how the Vision Pro could affect the work-life balance of digital nomads. It could talk about the potential benefits, like flexible workspaces and increased productivity, as well as potential challenges, such as the blurring of boundaries between work and personal life.

5. **"Is Apple's Vision Pro the Future of Remote Work? A Deep Dive into its Pros and Cons"**
   This piece could provide a balanced perspective on the Vision Pro as a tool for remote work. It could discuss the benefits of using the device (like its spatial computing capabilities and portability) but also address potential drawbacks (like its high cost or potential tech issues). This would provide a comprehensive overview for digital nomads considering investing in the technology.

Generate ideas for an article on a topic on your website, such as remote work, related to Vision Pro's top questions to capitalize on its popularity
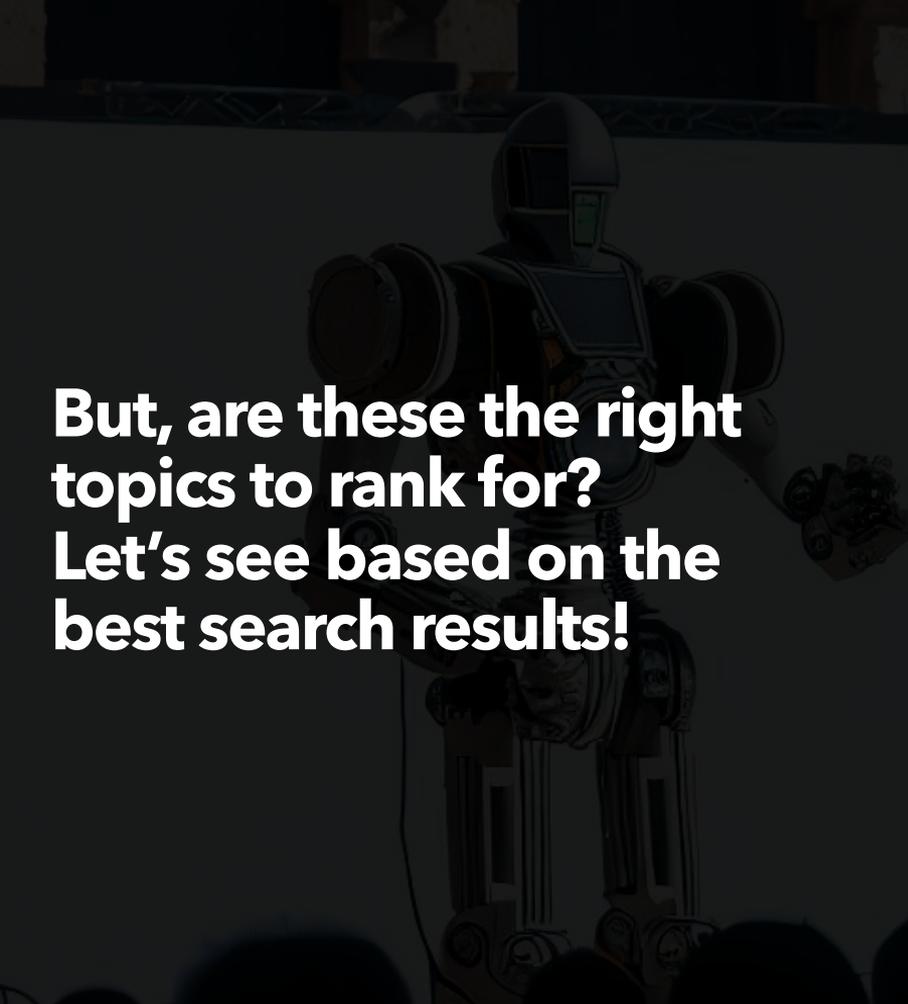

But, are these the right topics to rank for? Let's see based on the best search results!

MAXIMIZE YOUR SEO WITH AI C

1. **"The New Era of Communication: How Vision Pro's FaceTime Experience Will Change Remote Work"**
   This article would look at how Vision Pro's advanced FaceTime capabilities, which include the ability to display users in 3D and provide a more immersive communication experience, could change how remote teams communicate and collaborate.

2. **"Breaking Free from Physical Monitors: The Impact of Vision Pro on Remote Workspaces"**
   This article would explore how the Vision Pro can liberate digital nomads from the need for physical monitors or workspace setups. It could delve into how this standalone computer for the face can run the same apps from your iPhone or iPad but in a more versatile and portable format.

3. **"Unboxing Vision Pro: A Digital Nomad's First Impressions and How it Could Shape the Future of Remote Work"**
   This piece could serve as a first-hand account of using Vision Pro as a digital nomad, including its strengths, weaknesses, and potential for disrupting the remote work landscape. It could include insights on how features like the EyeSight and spatial computing capabilities could impact everyday work routines.

4. **"Vision Pro's visionOS: A Game-Changer for Digital Nomads"**
   This article would delve into the new operating system developed for Vision Pro, visionOS, and explore how its features could make remote work more efficient and immersive for digital nomads. It could also discuss how the ability to interact with digital content as if it is physically present could revolutionize various aspects of remote work.

5. **"Navigating the Challenges of Vision Pro for Remote Work: What Digital Nomads Need to Know"**
   This piece could provide a balanced perspective on using Vision Pro for remote work, addressing the potential challenges digital nomads may face, such as high cost, the need for a stable internet connection for optimal performance, and adapting to a completely new way of interacting with digital content. It would provide practical tips and strategies for overcoming these challenges.

Generate two outline alternatives for the proposed article about "Breaking Free from Physical Monitors: The Impact of Vision Pro on Remote Workspaces" to be published in June 2023 taking into account that it won't be available until 2024. The article should be optimized to rank for "Apple visition pro remote work"

Outline Alternative 1

I. Introduction
A. Brief introduction of Apple's Vision Pro
B. Mention its potential release date in 2024
C. Introduce the main topic of the article: how Vision Pro could impact remote workspaces

II. What is Vision Pro?
A. A deeper look at Vision Pro's features and capabilities
B. Emphasize on its ability to function as a standalone computer for the face
C. Discuss the operating system, visionOS

III. The Current State of Remote Workspaces
A. Brief discussion on the importance of physical monitors and equipment in current remote work setups
B. Highlight some of the challenges and limitations of current setups

IV. The Vision Pro Advantage: Breaking Free from Physical Monitors
A. Detailed discussion on how Vision Pro could eliminate the need for physical monitors
B. Explore the freedom and flexibility it offers for digital nomads
C. Discuss the potential advantages for multitasking and productivity

V. How Vision Pro Could Shape the Future of Remote Work
A. Discuss how Vision Pro could redefine the concept of workspace for remote workers
B. Potential impacts on collaboration and communication with tools like FaceTime
C. Discuss how Vision Pro could make remote work more accessible and versatile

VI. Conclusion
A. Recap of Vision Pro's potential impacts on remote workspaces
B. Final thoughts on the anticipation for its release and the future of remote work

Generate outline alternatives for the chosen article topic

Obtain a content brief to develop an optimized article for the selected outline

Generate a content brief using the first alternative of the previous outline along with instructions to develop an optimized article of 2000 words following SEO best practices to rank for "Apple Vision Pro remote work"

Content Brief

Title: Breaking Free from Physical Monitors: The Impact of Vision Pro on Remote Workspaces

Target Keyword: Apple Vision Pro remote work

Related Keywords: Apple Vision Pro features, Vision Pro for productivity, Vision Pro in professional settings, Vision Pro for telecommuting, Augmented reality in remote work, Apple Vision Pro release

Word Count: 2000 words

Audience: Technology enthusiasts, professionals, and those who are interested in remote work and telecommuting trends.

Content Goal: To inform the audience about the potential of Apple's Vision Pro in reshaping remote workspaces and improving productivity.

Tone: Informative, engaging, future-focused

Instructions

1. Introduction (200 words):
   Begin with a captivating introduction that highlights the growing trend of remote work and the role of technology in facilitating this shift. Briefly mention the Vision Pro and its potential to revolutionize telecommuting.
2. Overview of Apple Vision Pro (400 words):
   Provide an overview of the Vision Pro, focusing on its unique features like the visionOS control system, display quality, and EyeSight feature. Describe how these features are different from traditional monitors and existing VR/AR technologies. Use the information from the research performed and cite accordingly.
3. Potential Impact on Remote Workspaces (500 words):
   Discuss how the Vision Pro can transform remote workspaces. Highlight its potential to enable a more immersive and interactive workspace, enhance multi-tasking, and improve communication. Use hypothetical examples to illustrate these points.
4. Productivity and Efficiency with Vision Pro (400 words):
   Discuss how the Vision Pro can boost productivity and efficiency in remote work settings. Focus on features like the spatial operating system, controller-free operation, and the ability to connect to existing Mac computers. Discuss potential applications for these features in a professional context.
5. Addressing Potential Concerns (300 words):
   Acknowledge potential concerns related to the Vision Pro, such as its high price point, potential for social awkwardness due to the EyeSight feature, and the need for custom optical inserts for spectacle wearers. Discuss Apple's responses to these concerns and speculate on how these issues might be addressed over time.
6. Conclusion (200 words):
   Recap the main points and discuss the potential of the Vision Pro in shaping the future of remote work. End with a call-to-action, encouraging readers to keep an eye on this revolutionary technology.

SEO Best Practices:

- Use the target keyword ("Apple Vision Pro remote work") in the title, introduction, and conclusion. Try to include it naturally in the body text as well, without overdoing it.
- Use related keywords throughout the text. However, ensure they fit naturally into the content.
- Include internal links to other relevant articles on your website.
- Include external links to reputable sources to support the information you provide.
- Make sure the content is easy to read. Break up the text with subheadings, bullet points, and short paragraphs.
- Include images where relevant, and use alt text to describe them.

Remember, the goal is to provide valuable, informative content for the reader while also optimizing for SEO. The article should not only rank well but also engage readers and provide them with useful insights about the potential impact of the Vision Pro on remote workspaces.

After analyzing the content from the three provided links, the gelato providers that are consistently mentioned as one of the most popular ones in Rome are:

1. **Giolitti**: Established in 1890, Giolitti is one of Rome's oldest gelato shops. It's been in the same family since its inception and is known for its wide array of flavors. It's located near the Pantheon and the Trevi Fountain.
2. **Grom**: Grom is a popular chain of gelaterias that started in Turin in 2003 and now has locations worldwide, including several in Rome. It's known for its high-quality gelato and excellent fruit sorbet range.
3. **Il Gelato di San Crispino**: Located near the Trevi Fountain, Il Gelato di San Crispino is considered an institution in Rome. It's known for its fresh flavors and commitment to quality.
4. **Gelateria del Teatro**: Established in 2004, Gelateria del Teatro is known for its high-quality, Italian-sourced ingredients. It's located near the Castel Sant'Angelo or Piazza Navona.
5. **Come il Latte**: Specializing in super creamy gelato, Come il Latte is a favorite among many. It's located on Via Silvio Spaventa, a short walk from Rome's Termini train station.
6. **Gelateria dei Gracchi**: Located halfway between the Vatican and the Piazza Popolo, Gelateria dei Gracchi is known for its fresh, seasonal ingredients and delicious chocolate gelato.
7. **Fata Morgana**: Fata Morgana is known for its array of chocolate flavors and commitment to fresh, seasonal ingredients. It has several locations in Rome.
8. **Otaleg!**: Located in the Trastevere district, Otaleg is considered by many to be one of the best gelato providers in Rome. It offers around sixty flavors, all based on seasonally available produce.

Please note that the popularity of gelato providers can vary based on personal preference and the specific flavors offered. It's always a good idea to try a few different places and see which one you like the best!

List the top 3 mentioned headphones models and a summary of their characteristics in the top ranked pages for the "best remote work headphones" query

✔ Finished browsing ▾

Here are the top 3 headphones for remote work as per CNET's list and some details about them based on reviews from various sources:

1. **Jabra Evolve2 65 Flex**: This is a compact headset that gets the important things right, like a comfortable fit and good mic clarity, and really excels with excellent stereo audio performance. It's designed with comfort, mic clarity, and audio performance in mind, making it an excellent choice for people who need serious call clarity while also providing excellent stereo audio for listening to music. It has dedicated controls for Microsoft Teams, comes with a charging stand, and is optimized for MS or UC. The headset can be swiveled to mute/unmute the mic and answer incoming calls. However, it can be annoying to properly dock the headset for charging and audio playback between simultaneously paired computers and phones can get complicated [1].

2. **Sony WH-1000XM5**: These headphones pair top-notch noise cancellation with class-leading audio quality in a comfortable, attractive design. They offer excellent audio performance with robust bass depth and crisp highs, top-notch active noise cancellation, intuitive on-ear controls, and an app that offers an adjustable EQ and other customization settings. The headphones are quite expensive, but they provide excellent value for their price, offering comparable noise cancellation and arguably the best sound quality compared to other high-end noise-canceling headphones. They have a sleek and attractive over-ear build with capacitive touch controls that add another layer of functionality [2].

3. **Apple AirPods Pro 2**: These are described as improved Apple noise-canceling wireless earbuds with an enhanced fit for comfort, better battery life, and support for lossless audio and spatial audio. They offer improved noise cancellation and more music listening time compared to their predecessor. However, there are no options for wired listening and they are more expensive than other earbuds. Each earpiece houses an H1 chip that handles the heavy lifting of processing and connectivity. Pressing and holding the stem summons Siri. I faced technical difficulties while trying to gather more detailed information on this model, so you might want to explore further reviews for more comprehensive information [3] [4].

Please note that while these headphones are highly rated, the best choice for you will depend on your specific needs and preferences such as comfort, sound quality, noise cancellation capabilities, and budget.

Or ask for the top mentioned products/services/ topics from the best ranked pages for your targeted query

Or suggestions for new related topics, based on what has been covered on top ranked sites but without repeating them

T provide suggestions of new articles about Apple Vision Pro based on those top ranked ones for "apple vision pro" but without repeating them, recommend title, meta description and main headline, following SEO best practices

CS Certainly! Here are three article ideas based on the top-ranked articles about Apple Vision Pro:

1. Title: "Exploring the Future of Business with the Apple Vision Pro"
   Meta Description: "Discover how the Apple Vision Pro could transform the way we work and do business. From AR-enhanced productivity to remote collaboration, this spatial computer has endless potential."
   Main Headline: "The Apple Vision Pro: A Game-Changer for Business Productivity and Collaboration"

2. Title: "Apple Vision Pro: The Future of Education?"
   Meta Description: "Could the Apple Vision Pro revolutionize the way we learn and teach? Find out how this spatial computer is poised to transform education with its AR and VR capabilities, 4K display, and more."
   Main Headline: "Unlocking the Power of Learning with the Apple Vision Pro"

3. Title: "The Apple Vision Pro: A New Era of Entertainment?"
   Meta Description: "Get ready for a whole new level of entertainment with the Apple Vision Pro. Explore the device's AR and VR capabilities, Optic ID feature, and more, and see how it could change the way we consume media."
   Main Headline: "Immersive Entertainment with the Apple Vision Pro: What You Need to Know"

Following SEO best practices, these titles and meta descriptions include relevant keywords (e.g. "Apple Vision Pro," "AR," "VR," "4K display") while also being catchy and engaging. The main headlines are clear and concise, highlighting the main idea of each article.

Validate if it's possible to rank with the same page for two similar searches

are the same pages ranking in the top 10 results for "remote work" and "telecommuting"? How many overlay? List the URLs that are common between the two

✓ Searching for: **remote work**

✓ Searching for: **telecommuting**

✓ Searching for: **remote work vs telecommuting**

✓ Generating answers for you...

Hi, this is Bing. I can help you with that.👋

According to [1], remote work and telecommuting are similar but not exactly the same. Remote workers generally work exclusively from home or remote locations, while telecommuters are often required to work at least one day or more per week at an office.

To answer your question, I compared the top 10 results for "remote work" and "telecommuting" using [2] [3] [4] for "remote work" and [5] [6] [7] [8] for "telecommuting". I found that there are **no** pages that rank in both lists, so there is **no** overlay.

Are you looking for specific information about remote work or telecommuting? If so, please let me know what you are interested in.😊

Here are three alternatives for a 300 word description to be featured in a page selling the "Apple Vision Pro", taking into account the currently best ranked pages for the product, but without duplicating the content, following also SEO best practices:

1. The Apple Vision Pro is a mixed reality headset that combines the best of both artificial reality and virtual reality to merge the real world with the virtual world. In mixed reality, both physical and virtual objects can co-exist in the same environment in real time. The device will be capable of toggling between virtual reality (VR), and augmented reality (AR), which projects digital imagery while users still can see objects in the real world. It is a standalone headset that handles all of the computing inside its own containment.

2. The Apple Vision Pro is a computer that is worn on your face. Rather than view the computer's output through a physical screen, that output is projected onto your retina using lasers. This allows you to see digital images as if they were part of the real world. The device will be capable of toggling between virtual reality (VR), and augmented reality (AR), which projects digital imagery while users still can see objects in the real world.

3. The Apple Vision Pro is a wearable augmented reality headset designed for watching TV shows and movies, playing games, communicating, and collaborating. Generate FAQs for your products based on those featured in the top ranked pages but without duplicating them

T

Provide 5 Popular Questions and Answers suggestions based on the FAQs content featured in best ranked pages for "Apple Vision Pro", but without copying them.

CS

Sure, here are 5 popular questions and answers based on the FAQs content featured in the best-ranked pages for "Apple Vision Pro":

1. Q: What is the Apple Vision Pro and how does it work?
   A: The Apple Vision Pro is a powerful image recognition technology that uses advanced machine learning algorithms to identify objects, people, and other visual elements in photos and videos. It works by analyzing the patterns, colors, shapes, and other features of images to recognize and classify them.

2. Q: What are the benefits of using the Apple Vision Pro?
   A: The Apple Vision Pro offers a range of benefits for users, including improved image recognition accuracy, faster processing times, and more robust and reliable performance. It also enables developers to create innovative applications and services that leverage the power of image recognition technology.

3. Q: How accurate is the Apple Vision Pro?
   A: The accuracy of the Apple Vision Pro depends on a variety of factors, including the quality of the images or videos being analyzed, the complexity of the visual elements being identified, and the specific algorithms and models used for image recognition. In general, the Apple Vision Pro is highly

Check if the generated FAQs comply with Google Helpful Content Best Practices and Get Suggestions for it

Check that the FAQ content below complies with the content best practices specified by Google here: https://developers.google.com/search/docs/fundamentals/creating-helpful-content - if not, then please specify which snippet of the content doesn't, and provide alternatives:

Q: What features make Sony WH-1000XM5 a top-rated headphone?
A: The Sony WH-1000XM5 headphones are top-rated due to their excellent audio performance with robust bass depth and crisp highs, top-notch active noise cancellation, intuitive on-ear controls, and a comfortable, stylish design. They also come with an app offering an adjustable EQ and other customization setti... choice for music lovers1.

Q: How is the noise cancellation quality of the Sony WH...
A: The Sony WH-1000XM5 headphones feature top-no... means they're excellent at reducing ambient noise, mak... environments or during travel. They offer comparable n... high-end noise-canceling headphones, making them a...

Q: Are Sony WH-1000XM5 headphones comfortable fo...
A: Yes, the Sony WH-1000XM5 headphones are designed for comfort, even over long listening sessions. They feature a sleek and attractive over-ear build with synthetic leather headbands that match the color and matte surface of the earcups. The cups swivel down flat, making them easy to store and carry, adding to their convenience and comfort1.

Q: What controls are available on the Sony WH-1000XM5 headphones?
A: The Sony WH-1000XM5 headphones come with intuitive on-ear controls. The left earcup houses dedicated buttons for power/pairing and ANC/Ambient modes. The right ear's outer panel features capacitive touch controls that allow you to swipe forward or backward to navigate through tracks, swipe up or down to handle volume, and double-tap to manage playback and calls. A press and hold summons your phone's voice assistant. These controls are designed to be intuitive and easy to use1.

Based on the guidelines provided by Google, here are the areas where the FAQ content could be improved:

1. **Originality and Value**: While the content does provide useful information about the Sony WH-1000XM5 headphones, it doesn't seem to offer any original insights or analysis that goes beyond the obvious. To improve this, consider including unique insights or experiences, such as personal testimonials or comparisons with other similar products. For example, instead of saying "The Sony WH-1000XM5 headphones are top-rated due to their excellent audio performance...", you could say "Having tested the Sony WH-1000XM5 headphones ourselves, we found that their audio performance truly stands out, especially when compared to other headphones in the same price range..."

2. **Expertise**: The content does not provide clear evidence of expertise or authority on the topic. To improve this, consider including information about the author's qualifications or experience with the product.
   For example, you could say "Our audio equipment expert, who has over 10 years of experience in the field and has personally tested hundreds of headphones, believes that the Sony WH-1000XM5 headphones are..."

3. **Trustworthiness**: The content does not provide clear sourcing for the information provided. To improve this, consider including references to reputable sources that back up the claims made in the content.
   For example, instead of saying "They offer top-notch noise cancellation...", you could say "According to a review by [reputable source], the Sony WH-1000XM5 headphones offer top-notch noise cancellation..."

4. **People-First Content**: The content does seem to be written with the user in mind, providing useful information about the product. However, to further improve this, consider focusing on the needs and questions of the user, providing in-depth answers that leave the user feeling satisfied and informed.

Remember, the goal is to create content that is helpful, reliable, and primarily created to benefit people, not to gain search engine rankings.

Provide and explain 3 Pro's and 3 Con's of the apple watch series 8 vs other similar watches, based on the information found in the top ranked pages for "Apple Watch 8 Pro's and Con's", without copying it, while making it accurate and factual

Apple Watch Series 8 has several pros and cons compared to other similar watches in the market. Here are three pros and cons of the Apple Watch Series 8:

Pros:

1. Improved Battery Life: The Apple Watch Series 8 has a longer battery life, thanks to its optimized software and new processor. This means users can enjoy longer periods of usage without the need for frequent charging.

2. Fast Charging Capability: The watch can now be charged up to 80% in 45 minutes, which is a significant improvement from its predecessor.

3. Advanced Health and Fitness Features: The Apple Watch Series 8 has advanced features for tracking health and fitness, including improved sensors for monitoring heart rate, blood pressure, and blood oxygen levels. It also offers a wide range of workouts and coaching plans.

Cons:

1. Expensive: The Apple Watch Series 8 is one of the most expensive smartwatches in the market, making it less accessible to budget-conscious users.

2. Limited Compatibility: The watch is only fully compatible with Apple devices, which means it cannot be used with Android smartphones or other devices outside the Apple ecosystem.

3. Dependence on iPhone: The Apple Watch Series 8 requires an iPhone to make calls and send messages, which means that users cannot fully utilize the watch without an iPhone.

Overall, the Apple Watch Series 8 is an excellent smartwatch that offers advanced features for tracking health and fitness, longer battery life, and fast charging capability. However, its high price, limited compatibility, and dependence on an iPhone may not be ideal for everyone.

Leverage ChatGPT plugins to get facts and statistics to integrate into your articles along with their sources

Provide and summarize the top facts about intermittent fasting along with URLs to back them up

Used **Scholarly**

Here are some key facts about intermittent fasting, backed by research:

1. **Weight Loss and Metabolic Health**: Intermittent fasting is a method that involves various schedules for temporary food avoidance, such as alternate-day fasting and time-restricted feeding (eating within a 6-hour period and fasting for 18 hours). These feeding schedules can lead to a decrease in weight and improvements in dyslipidemia and blood pressure. They work by intermittently inducing the metabolism of fatty acids to ketones. However, more research is needed on longer-term outcomes, and this approach should be avoided in certain health conditions [source].

2. **Obesity and Diabetes**: Intermittent fasting has become a popular strategy for weight loss, especially among young people. It has shown positive effects in both animal studies and human trials. However, more large-scale and long-term experiments are needed to understand its long-term effects and potential side effects, especially in patients with obesity and type 2 diabetes mellitus [source].

3. **Brain Metabolism**: Intermittent fasting induces several molecular and cellular adaptations in neurons, enhancing cellular stress resistance, synaptic plasticity, and neurogenesis. However, more research is needed to understand the different intermittent fasting protocols and their long-term effects on brain metabolism [source].

4. **Gut Microbiome**: Intermittent fasting can cause substantial remodeling of the gut microbiome. For example, Ramadan-associated intermittent fasting increased microbiome diversity and was specifically associated with upregulation of certain bacterial families [source].

5. **Blood Pressure**: Intermittent fasting can prevent elevations in blood pressure by maintaining a healthy gut microbiota. This was demonstrated in a study using every-other-day-fasting (EODF) in rats [source].

6. **Weight Loss and Cardiometabolic Risk Reduction**: A study showed that alternate-day fasting (ADF) had more significant reduction effects on body weight and body mass index than 16/8 time-restricted fasting (16/8 TRF). This suggests the potential benefit of integrating intermittent fasting regimens into normal dietary patterns to reduce the risk of diabetes and cardiovascular disease [source].

7. **Nonalcoholic Fatty Liver Disease**: Intermittent fasting could be beneficial in the management of nonalcoholic fatty liver disease, given the condition's association with obesity. However, more clinical studies are needed to determine its safety and efficacy in this population [source].

8. **Obesity-Related Health Outcomes**: An umbrella review of 11 meta-analyses of randomized clinical trials found that intermittent fasting may have a beneficial role in improving anthropometric and cardiometabolic outcomes, especially for adults with overweight or obesity [source].

Cross-check the facts and originality of the content and ask it to make it unique and factual if it isn't yet

Verify if the following information is factual, and if not, provide actual insight and source to it with a URL:

Here are some key facts about intermittent fasting, backed by research:

Weight Loss and Metabolic Health: Intermittent fasting is a method that involves various schedules for temporary food avoidance, such as alternate-day fasting and time-restricted feeding (eating within a 6-hour period and fasting for 18 hours). These feeding schedules can lead to a decrease in weight and improvements in dyslipidemia and blood pressure. They work by intermittently inducing the metabolism of fatty acids to ketones. However, more research is needed on longer-term outcomes, and this approach should be avoided in certain health conditions [source].

Obesity and Diabetes: Intermittent fasting has become a popular strategy for weight loss, especially among young people. It has shown positive effects in both animal studies and human trials. However, more large-scale and long-term experiments are needed to understand its long-term effects and potential side effects, especially in patients with obesity and type 2 diabetes mellitus [source].

Brain Metabolism: Intermittent fasting induces several molecular and cellular adaptations in neurons, enhancing cellular stress resistance, synaptic plasticity, and neurogenesis. However, more research is needed to understand the different intermittent fasting protocols and their long-term effects on brain metabolism [source].

Gut Microbiome: Intermittent fasting can cause substantial remodeling of the gut microbiome. For example, Ramadan-associated intermittent fasting increased microbiome diversity and was specifically associated with upregulation of certain bacterial families [source].

Blood Pressure: Intermittent fasting can prevent elevations in blood pressure by maintaining a healthy gut microbiota. This was demonstrated in a study using every-other-day-fasting (EODF) in rats [source].

✓ Searching for: **Intermittent fasting backed by research**

✓ Generating answers for you…

The information you provided is mostly factual. Intermittent fasting is a method that involves various schedules for temporary food avoidance, such as alternate-day fasting and time-restricted feeding (eating within a 6-hour period and fasting for 18 hours). These feeding schedules can lead to a decrease in weight and improvements in dyslipidemia and blood pressure. They work by intermittently inducing the metabolism of fatty acids to ketones [1].

Intermittent fasting has become a popular strategy for weight loss, especially among young people. It has shown positive effects in both animal studies and human trials. However, more large-scale and long-term experiments are needed to understand its long-term effects and potential side effects, especially in patients with obesity and type 2 diabetes mellitus [2].

Intermittent fasting induces several molecular and cellular adaptations in neurons, enhancing cellular stress resistance, synaptic plasticity, and neurogenesis. However, more research is needed to understand the different intermittent fasting protocols and their long-term effects on brain metabolism [3].

Intermittent fasting can cause substantial remodeling of the gut microbiome. For example, Ramadan-associated intermittent fasting increased microbiome diversity and was specifically associated with upregulation of certain bacterial families [4].

MAXIMIZE YOUR SEO WITH

Provide recommendations to improve the largest contentful paint for each of these previous pages taking into account the metrics provided in each case, explaining why

Largest Contentful Paint (LCP) is a metric that measures the time it takes for the largest content element in the viewport to become visible. It's an important user-centric metric for measuring perceived load speed because it marks the point in the page load timeline when the page's main content has likely loaded.

Here are some recommendations to improve the LCP for each of the pages:

1. **https://wordlift.io/**
   - LCP: 2.506 seconds
   - Recommendations:
     - Optimize and compress images: The largest contentful paint is often an image. If the images on your site are large, they could be slowing down your LCP. Consider compressing them or converting them to more efficient formats like WebP.
     - Remove any unnecessarily third-party scripts: These can block the main thread and delay the paint of the main content.
     - Implement lazy loading: This means only loading images when they're needed (i.e., when they enter the viewport), which can significantly speed up the initial load time.

2. **https://wordlift.io/seo-for-non-wordpress-ecommerce/**
   - LCP: 2.211 seconds
   - Recommendations:
     - Reduce server response times: Your server response time was flagged as a potential issue. Consider optimizing your server, using a Content Delivery Network (CDN), or caching assets to improve this.
     - Optimize CSS: Excessive or inefficient CSS can block the rendering of your page and delay the LCP. Consider minimizing and deferring non-critical CSS, and inline critical CSS.

Generate PHP code to automatically generate an XML sitemap for any new indexable URLs published on https://www.domain.com, removing any URL that is not indexable

Here's an example of PHP code that can automatically generate an XML sitemap for any new indexable URLs published on https://www.domain.com, removing any URL that is not indexable:

```php
php                                                          Copy code

<?php

// Get the list of all pages on the website
$url = "https://www.domain.com";
$all_pages = file_get_contents($url);
preg_match_all('/<a\s[^>]*href=[\'"]?([^\'" >]+)[\'"]?[^>]*>/i', $all_pages,
$all_urls = $matches[1];

// Filter out non-indexable URLs
$indexable_urls = array_filter($all_urls, function($url) {
    return strpos($url, '/noindex') === false;
});

// Generate the XML sitemap
$xml = '<?xml version="1.0" encoding="UTF-8"?>' . "\n";
$xml .= '<urlset xmlns="http://www.sitemaps.org/schemas/sitemap/0.9">' . "\n
foreach ($indexable_urls as $url) {
    $xml .= '  <url>' . "\n";
    $xml .= '    <loc>' . htmlspecialchars($url) . '</loc>' . "\n";
    $xml .= '    <lastmod>' . date('c', time()) . '</lastmod>' . "\n";
    $xml .= '  </url>' . "\n";
}
$xml .= '</urlset>';

// Save the XML sitemap to a file
file_put_contents('sitemap.xml', $xml);

?>
```

Get the PHP code to automatically generate XML sitemaps for any new indexable URL that is published

Generate a hierarchical navigation structure for a list of your Website URLs

Propose a hierarchical navigation structure for a website featuring the following URLs

https://learningseo.io/
https://learningseo.io/free-seo-tests-quizzes/
https://learningseo.io/keep-up-with-news/
https://learningseo.io/other-search-engines/
https://learningseo.io/seo-fundamentals/content-optimization/
https://learningseo.io/why-my-page-doesnt-rank/
https://learningseo.io/execute-seo/seo-audits-recommendations/
https://learningseo.io/seo-fundamentals/link-building/
https://learningseo.io/complement-knowledge/
https://learningseo.io/seo-fundamentals/technical-seo/
https://learningseo.io/online-seo-courses/
https://learningseo.io/seo-fundamentals/competition-analysis/
https://learningseo.io/specialize/
https://learningseo.io/implement-in-cms/
https://learningseo.io/execute-seo/seo-reporting/
https://learningseo.io/automate-tasks/
https://learningseo.io/execute-seo/seo-measurement/
https://learningseo.io/seo-fundamentals/keyword-research/
https://learningseo.io/seo-tools/
https://learningseo.io/cdn-cgi/l/email-protection
https://learningseo.io/seo-fundamentals/
https://learningseo.io/execute-seo/

Here is a possible hierarchical navigation structure for the given URLs:

- Home
  - Free SEO Tests & Quizzes
  - Keep Up with News
  - Other Search Engines
  - SEO Fundamentals
    - Content Optimization
    - Why My Page Doesn't Rank
    - Link Building
    - Technical SEO
    - Competition Analysis
    - Keyword Research
  - Execute SEO
    - SEO Audits & Recommendations
    - SEO Reporting
    - SEO Measurement
  - Complement Knowledge
  - Specialize
  - Implement in CMS
  - Online SEO Courses
  - SEO Tools
  - Automate Tasks

Note: The URLs with parameters have been excluded as they are often dynamically generated and not suitable for inclusion in a hierarchical navigation structure. Also, the URL ending with "cdn-cgi/l/email-protection" is excluded as it appears to be a cloud-based email obfuscation service and not relevant to the website's content.

Obtain cross-linking suggestions for a list of URLs based on their semantic relevance

Propose which of the following URLs should cross-link to each other based on their semantic relevance:

https://learningseo.io/
https://learningseo.io/free-seo-tests-quizzes/
https://learningseo.io/keep-up-with-news/
https://learningseo.io/other-search-engines/
https://learningseo.io/seo-fundamentals/content-optimization/
https://learningseo.io/why-my-page-doesnt-rank/
https://learningseo.io/execute-seo/seo-audits-recommendations/
https://learningseo.io/seo-fundamentals/link-building/
https://learningseo.io/complement-knowledge/
https://learningseo.io/seo-fundamentals/technical-seo/
https://learningseo.io/online-seo-courses/
https://learningseo.io/seo-fundamentals/competition-analysis/
https://learningseo.io/specialize/
https://learningseo.io/implement-in-cms/
https://learningseo.io/execute-seo/seo-reporting/
https://learningseo.io/automate-tasks/
https://learningseo.io/execute-seo/seo-measurement/
https://learningseo.io/seo-fundamentals/keyword-research/
https://learningseo.io/seo-tools/
https://learningseo.io/cdn-cgi/l/email-protection
https://learningseo.io/seo-fundamentals/
https://learningseo.io/execute-seo/

Here is a proposed cross-linking structure based on the semantic relevance of the URLs:

- https://learningseo.io/
  - Cross-link to:
    - https://learningseo.io/free-seo-tests-quizzes/
    - https://learningseo.io/keep-up-with-news/

Get step by step instructions for canonicalizing via HTTP Headers on an Apache server

Give me the steps to add canonical tags via HTTP headers in an apache web server, so any page without parameters self-refer. URLs with parameters should add a canonical tag pointing to their URLs without parameters instead.

To add canonical tags via HTTP headers in an Apache web server, so any page without parameters self-refers and URLs with parameters add a canonical tag pointing to their URLs without parameters instead, follow these steps:

1. Open the Apache configuration file for your website. This file is typically located in the `/etc/httpd/conf` or `/etc/apache2/sites-available` directory, depending on your server configuration.
2. Add the following code to the configuration file, within the `VirtualHost` block for your website:

```bash
fModule mod_headers.c>
   # Self-referencing canonical for pages without parameters
   Header set Link "<{{REQUEST_URI}}>; rel='canonical'"
   # Add canonical for pages with parameters, pointing to URL without parameter
   RewriteEngine On
   RewriteCond %{QUERY_STRING} .+
   RewriteRule ^(.*)$ /$1? [R=301,L]
   Header set Link "<{{REQUEST_SCHEME}}://{{HTTP_HOST}}{{REQUEST_URI}}>; rel='c
IfModule>
```

3. Save the configuration file and restart the Apache web server.

This code will add canonical tags via HTTP headers for all pages on your website. Pages without parameters will have a self-referencing canonical tag, and pages with parameters will add a canonical tag pointing to their corresponding URL without parameters.

Give me the steps to add hreflang annotations via HTTP headers in an apache web server. Any page under the subdirectory https://www.domain.com/es/ should have the Spanish value, and any pages that are under the subdirectory https://www.domain.com/en/ should have the English value

To add hreflang annotations via HTTP headers in an Apache web server, you can follow these steps:

1. Open your Apache web server configuration file (httpd.conf or apache2.conf, depending on your system).
2. Add the following code to the file:

```
wasm                                                    Copy code
odule mod_headers.c>
ilesMatch "\.(html|php)$">
eader set Link '<https://www.domain.com/es/$1>; rel="alternate"; hreflang="es
                <https://www.domain.com/en/$1>; rel="alternate"; hreflang="en
ilesMatch>
odule>
```
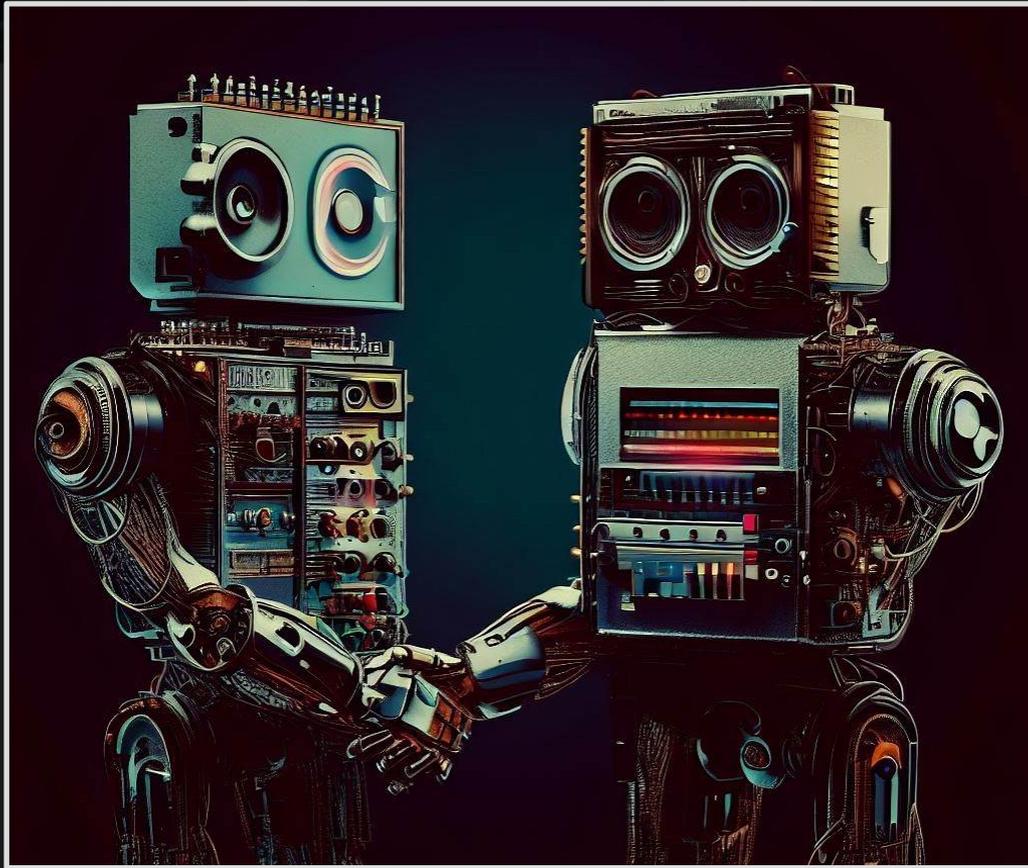

3. Save and close the configuration file.
4. Restart your Apache web server to apply the changes.

This code adds the hreflang annotations to the HTTP headers of any HTML or PHP page that is requested from the web server. The `<FilesMatch>` directive is used to match the file extensions of the pages that you want to add hreflang annotations to. The `Header set Link` directive sets the Link header with two alternate URLs, one for the Spanish version of the page and one for the English version of the page. The `$1` variable is a placeholder that gets replaced with the actual URL of the requested page.

With this configuration, any page under the subdirectory https://www.domain.com/es/ will have the Spanish value, and any page that is under the subdirectory https://www.domain.com/en/ will have the English value.

You can also get instructions on how to implement hreflang via HTTP Headers on an Apache server

Get the PHP code to integrate FAQPage structured markup for any guide published on your website

Generate a PHP code that generates FAQPage structured data for any page under the https://domain.com/guide/ subdirectory, including H3 as questions and text with the <answer> tag as answers

Sure! Here's an example PHP code that generates FAQPage structured data for any page under the https://domain.com/guide/ subdirectory, including H3 as questions and text with the <answer> tag as answers:

```php
<?php
// Define the base URL of your website
$base_url = "https://domain.com";

// Get the URL of the current page
$current_url = "$_SERVER[HTTP_HOST]$_SERVER[REQUEST_URI]";

// Check if the current page is under the /guide/ subdirectory
if (strpos($current_url, '/guide/') !== false) {

    // Get the page content
    $page_content = file_get_contents("https://$current_url");

    // Extract the H3 headings and their corresponding answer tags
    preg_match_all('/<h3.*?>(.*?)<\/h3>(.*?)<answer>(.*?)<\/answer>/', $page

    // Generate the FAQPage structured data
    $structured_data = array(
        "@context" => "https://schema.org",
        "@type" => "FAQPage",
        "mainEntity" => array()
    );

    // Loop through the H3 headings and answer tags
    foreach ($matches as $match) {
        $question = strip_tags($match[1]); // Strip any HTML tags from the q
        $answer = strip_tags($match[3]); // Strip any HTML tags from the ans
        $faq_item = array(
            "@type" => "Question",
```

What's the stance of Jason Fried regarding remote work? Provide the top insights of what he has written about the topic along with sources and URLs

Jason Fried is a well-known advocate of remote work and has written extensively on the topic. He is the co-founder and CEO of Basecamp, a remote work software company. Here are some of his top insights on remote work along with sources and URLs:

1. Remote work is a better way to work - According to Jason Fried, remote work allows people to work better because it eliminates distractions and enables them to focus on their work. He argues that remote work also leads to better productivity, creativity, and work-life balance. (Source: TED Talk - "Why work doesn't happen at work")

2. Remote work is not just for tech companies - Jason Fried believes that remote work is not just for tech companies but can be implemented in any industry. He cites examples of companies in manufacturing, healthcare, and retail that have successfully implemented remote work. (Source: Inc. - "The 5 Biggest Myths About Remote Work")

3. Remote work requires trust and communication - According to Jason Fried, remote work requires trust between the employer and the employee. It also requires clear communication and expectations to be set upfront. (Source: Harvard Business Review - "Why Remote Work Thrives in Some Companies and Fails in Others")

4. Remote work is the future of work - Jason Fried predicts that remote work will become the norm in the future. He argues that remote work is not a trend but a fundamental shift in how people work. (Source: The New York Times - "Remote Work Is Here to Stay. Manhattan May Never Be the Same.")

5. Remote work is not just about the tools - Jason Fried emphasizes that remote work is not just about the tools, but about the culture and mindset of the organization. He argues that companies need to shift their focus from the physical workplace to the work itself. (Source: The Wall Street Journal - "Why Companies Shouldn't Worry About Remote Workers Slacking Off")

Prompt:

write a personalized, professional, short but engaging and actionable outreach email to Jason Fried, using the previously specified insights about him, to get in touch with him via email asking him for a quote for your latest remote work trends article in remoters.net . To facilitate the process ask him to just reply to the email with his quote and you'll provide the relevant citation.

Response:

Dear Jason Fried,

I hope this email finds you well. As a fan of your work and your insights on remote work, I wanted to reach out to you regarding our latest article on remote work trends on Remoters.net. Given your expertise and extensive writing on remote work, we would be honored to include a quote from you in our article.

We would be thrilled if you could share with us a few thoughts on the current state and trends of remote work. Your contribution would add tremendous value to our article and our readers.

If you would be interested in contributing, we would only need a short quote from you. You can simply reply to this email with your quote and we will provide the relevant citation.

Thank you for your time and consideration, and we hope to have the privilege of featuring your insights in our article.

Best regards,

In the last weeks, I've seen many in the SEO community voice their concern about their future as SEOs due to AI and Search Engines' Chatbots quick evolution.

Here's what I think about it, and why you shouldn't be worried *IF* you're strategic about it.

"Can further automation of SEO tasks w/ AI replace SEOs?"

It will if you're focused on "low level" and/or highly tactical tasks & you're a "one trick pony" who only does that single highly tactical or low level task. Eg: You generate title tags based on a list of keywords but you haven't selected the keywords, and don't know *WHY* they're being targeted with those pages that you're writing titles for. Recommendation: Understand the *why* of SEO tasks, become strategical, this is what ultimately drives real value in SEO processes.

Also, SEO stops being a "knowledge" problem and starts becoming an "execution" challenge very quickly in many bigger processes in bureaucratic scenarios/organizations. SEOs capacity to communicate, influence and coordinate stakeholders, as well as other "soft skills" become core to the success of the project in these cases. It will be *hard* for a bot to replace that Recommendation: Start improving those skills and position yourself to perform a key role in SEO execution success!

https://www.linkedin.com/pulse/future-seo-ai-aleyda-sol%C3%ADs/

And if you don't get involved in the management and coordination of SEO execution, which a bot can't do
