A woman with blonde hair styled in an updo, wearing a dark, lace-trimmed historical dress, stands in profile on a stone ledge. She gazes towards the left, where a large, classical-style statue of a standing figure is visible. The background features a two-story house and lush greenery, all bathed in the warm, golden light of a setting or rising sun. The overall mood is contemplative and serene.

CNET's Article-Writing AI Is Already Publishing Very Dumb Errors

CNET is now letting an AI write articles for its site. The problem? It's kind of a moron.

Google Search's guidance about AI-generated content

[Send feedback](#)

Wednesday, February 8, 2023

At Google, we've long believed in the power of AI to transform the ability to deliver helpful information. In this post, we'll share more about how AI-generated content fits into our long-standing approach to show helpful content to people on Search.

Rewarding high-quality content, however it is produced

Google's ranking systems aim to reward original, high-quality content that demonstrates qualities of what we call E-E-A-T: expertise, experience, authoritativeness, and trustworthiness. We share more about this [in our How Search Works site](#).

Our focus on the quality of content, rather than how content is produced, is a useful guide that has helped us deliver reliable, high quality results to users for years.

For example, about 10 years ago, there were understandable concerns about a rise in mass-produced yet human-generated content. No one would have thought it reasonable for us to declare a ban on all human-generated content in response. Instead, it made more sense to improve our systems to reward quality content, [as we did](#).

Focusing on rewarding quality content has been core to Google since we began. It continues today, including through our [ranking systems](#) designed to [surface reliable information](#) and our [helpful content system](#). The helpful content system was introduced last year to better ensure those searching get content created primarily for people, rather than for search ranking purposes.

How automation can create helpful content

When it comes to automatically generated content, our guidance has been consistent for years. Using automation—including AI—to generate content with the primary purpose of manipulating ranking in search results is a [violation of our spam policies](#).

Google has many years of experience dealing with automation being used in an attempt to game search results. Our spam-fighting efforts—including our [SpamBrain system](#)—will continue, however spam is produced.

This said, it's important to recognize that not all use of automation, including AI generation, is spam. Automation has long been used to generate helpful content, such as sports scores, weather forecasts, and transcripts. AI has the ability to power new levels of expression and creativity, and to serve as a critical tool to help people create great content for the web.

...anche perché se il contenuto creato con AI non è di per sé "proibito", comunque è soggetto alle ormai classiche linee guida legate all'E-E-A-T

@gfiorelli1

Our advice for creators considering AI-generation

As explained, however content is produced, those seeking success in Google Search should be looking to produce original, high-quality, people-first content demonstrating qualities E-E-A-T.

Creators can learn more about the concept of E-E-A-T on our [Creating helpful, reliable, people-first content](#) help page. In addition, we've updated that page with some guidance about thinking in terms of [Who, How, and Why](#) in relation to how content is produced.

Evaluating your content in this way, whether you're using AI-generated content or not, will help you stay on course with what our systems seek to reward.

FAQ

To further help, here are some answers to questions you may have about AI content and Google Search:

Is AI content against Google Search's guidelines?

Appropriate use of AI or automation is not against our guidelines. This means that it is not used to generate content primarily to manipulate search rankings, which is [against our spam policies](#).

Why doesn't Google Search ban AI content?

Automation has long been used in publishing to create useful content. AI can assist with and generate useful content in exciting new ways.

How will Google Search prevent poor quality AI content from taking over search results?

Poor quality content isn't a new challenge for Google Search to deal with. We've been tackling poor quality content created both by humans and automation for years. We have existing [systems](#) to determine the [helpfulness of content](#). Other systems work to elevate [original news reporting](#). Our systems continue to be [regularly improved](#).

Però limitare l'uso dell'AI solo alla creazione di testi non è avvantaggiarsi delle infinite opportunità che ci offre.

The screenshot shows a search result on Perplexity AI. The main heading is "What is the best way to paint details on miniatures". Below the heading, it states: "To paint details on miniatures, it is recommended to use a small brush and to barely put any paint on it. Dip just the tip of the brush and mix a drop of water into the paint to make it thinner and easier to apply. It is also important to maintain a comfortable body posture and take painting breaks to avoid eye strain and fatigue. Additionally, it is crucial to prepare the miniature properly before painting by washing it to remove any mold release agent that may interfere with paint adhesion. Acrylic paints are the most commonly used for painting miniatures, as they are non-toxic, environmentally friendly, and easier to use and clean up." Google Bard

Stesso prompt:

'What are the 10 most common questions about "painting miniatures" ?'

Bard non presenta risorse (lo fa solamente in casi molto specifici).

Se clicchiamo su "Google it" apriamo la SERP corrispondente alla domanda del nostro prompt. Non è proprio come avere direttamente le fonti nella risposta di Bard, ma ci offre comunque la base per fare ulteriori indagini.

The screenshot displays the Google Bard interface. On the left, there is a sidebar with navigation options: Bard (Experiment), Reset chat, Bard Activity, FAQ, and Help & support. The main content area shows a list of 10 questions and answers related to painting miniatures. A red arrow points to a 'Google it' button located at the bottom of the list. Below the list, there is a search bar for related topics, which contains the query '10 most common questions about "painting miniatures"'. At the bottom of the interface, there is a text input field labeled 'Enter a prompt here' and a disclaimer: 'Bard may display inaccurate or offensive information that doesn't represent Google's views.'

There are many different types of brushes available for miniature painting. The most common types are synthetic brushes and natural hair brushes. Synthetic brushes are made from man-made materials, such as nylon or polyester. Natural hair brushes are made from animal hair, such as kolinsky sable or badger hair.

5. What is the best surface to paint on?
The best surface to paint on for miniatures is a smooth, flat surface, such as a piece of cardboard or a plastic sheet. You can also use a canvas, but it is not necessary.
6. How do I clean my brushes?
The best way to clean your brushes is to use a soapy water solution. You can also use a brush cleaner, but it is not necessary.
7. How do I start painting a miniature?
The first step in painting a miniature is to prime the miniature. Priming helps the paint to adhere to the surface of the miniature. You can use a spray primer or a brush-on primer.
8. How do I paint a miniature?
The best way to paint a miniature is to use a thin coat of paint. You can use a brush or a spray gun.
9. How do I finish a miniature?
The best way to finish a miniature is to use a clear coat. Clear coat helps to protect the paint and give the miniature a shiny finish. You can use a spray clear coat or a brush-on clear coat.
10. How do I store miniatures?
The best way to store miniatures is to put them in a box or a bag. You can also use a display stand to hold them up.

Torniamo a ChatGPT.

Adesso possiamo indicargli di "leggere" un contenuto col dargli il suo URL.

Possiamo, per esempio, chiedergli uno schema dei temi trattati dall'articolo.

Nota: sempre meglio leggerlo anche noi... a volte non presenta temi importanti.

summarize in bullet points <https://www.polygon.com/tabletop-games/23643118/how-to-paint-miniatures>

- Painting miniatures is a popular hobby that requires some materials and techniques.
- Some essential materials include paint brushes, paint, primer, and a palette.
- Miniature painting can be done in several steps, such as priming, base coating, layering, shading, and highlighting.
- There are various techniques to achieve different effects, such as dry brushing, washes, and glazes.
- Attention to detail is crucial when painting miniatures, especially when working on small and intricate parts.
- It's recommended to practice and experiment with different techniques to improve skills and find personal style.
- Cleaning and maintaining the materials is also important to ensure the longevity and quality of the painted miniatures.

Continuiamo la conversazione chiedendo a ChatGPT di estrarre le entità principali dell'articolo appena letto tenendo come base l'ontologia dell'entità "miniatures painting"

Now extract the entities presented in the article you just read and sort them in order of weight and relevance with the ontology "miniatures painting"

Please write in English (US) language.

Sure, here are the entities presented in the article "How to paint miniatures" sorted in order of weight and relevance with the ontology of miniature painting:

Grazie a ChatGPT possiamo capire meglio il motivo di queste relazioni, e usare il suo output per classificare e categorizzare meglio queste stesse entità, utilizzando queste informazioni per molteplici scopi.

L'ideale, per questa ricerca, è utilizzare le API di ChatGPT, perché così possiamo ampliare il set di Images Search Tags da far analizzare (<https://mixedanalytics.com/knowledge-base/import-openai-chatgpt-data-to-google-sheets/>).

The following entities and attributes relate to the main entity "wet palette" in the following ways:

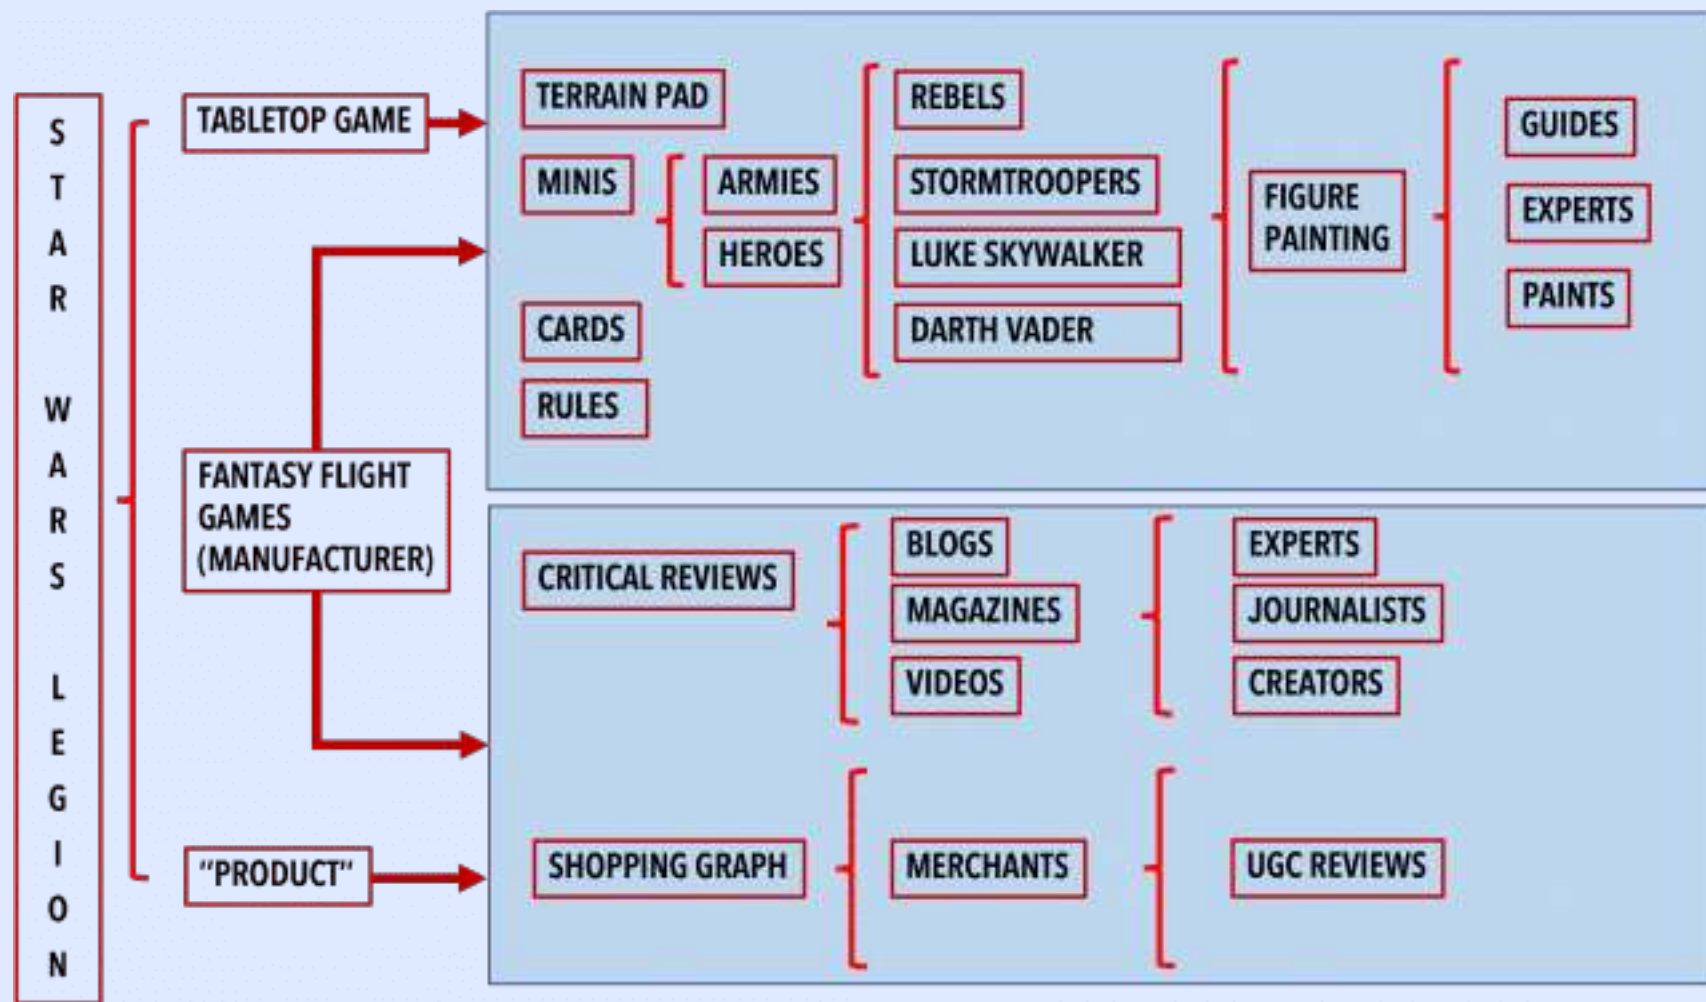

- Miniature painting: A wet palette is commonly used in miniature painting as it keeps the paint wet and usable for longer periods of time.
- Acrylic: A wet palette is often used with acrylic paints, as it can help prevent the paint from drying out too quickly.
- Everlasting: Some wet palettes are marketed as "everlasting," indicating that they are designed to last for a long time and not wear out quickly.
- Warhammer: Wet palettes are commonly used in Warhammer miniature painting as it allows for more control and precision while painting small details.
- DIY: Some wet palettes can be made as a DIY project, using materials such as parchment paper and a plastic container.
- Masterson: Masterson is a brand that produces wet palettes designed for use with acrylic paints.
- Citadel: Citadel is a brand that produces paints and other supplies for miniature painting, including wet palettes.
- Watercolor and gouache: While wet palettes are commonly used with acrylic paints, they can also be used with other types of water-based paints, such as watercolor and gouache.
- Rowney Stay Wet: Rowney Stay Wet is a type of palette paper that is designed to stay wet and usable for longer periods of time, making it a good option for use with a wet palette.
- Box: A wet palette typically comes in the form of a small plastic container or box that can be sealed to keep the paint from drying out.

Topics in common:

1. **Basic painting techniques:** All three articles cover basic techniques such as base coating, layering, shading, and highlighting, along with some tips and tricks for achieving the desired results.
2. **Necessary tools and equipment:** The articles also talk about the tools and equipment needed for miniature painting, such as brushes, paints, palettes, and primers.
3. **Preparation of miniatures:** Each article provides instructions on how to prepare the miniature figure for painting, including cleaning, priming, and assembling.
4. **Common problems and their solutions:** All three articles address common problems that painters might encounter, such as paint drying too quickly or not adhering properly, and offer solutions for these issues.

Topics uniquely treated by each article:

1. **Polygon.com:** This article focuses heavily on providing product recommendations for various tools and materials, as well as tips for where to purchase them. It also provides a step-by-step guide for beginners, starting with the basics and gradually progressing to more advanced techniques.
2. **Leisureguided.com:** This article takes a question-and-answer format, addressing the most common questions that beginners might have, such as "What kind of paint should I use?" and "How do I avoid brush strokes?" It also covers some more specialized topics such as airbrushing and weathering.
3. **Tangibleday.com:** This article provides a quick-start guide for miniature painting, with a focus on preparing the figure for painting. It includes information on how to remove mold lines, how to fill gaps, and how to glue parts together. It also offers some advice on selecting a color scheme and creating a cohesive look for a group of miniatures.

Caso reale di landing page di assicurazioni in un sito spagnolo

Bloque de preguntas (desde “¿Cuánto se tarda en calcular el precio de mi seguro de coche? hasta ¿Cómo ahorrar en tu seguro de coche?). Este bloque y el bloque “FAQ”, que se encuentra más abajo, son redundantes entre ellos, por lo cual se debería o agruparlas y eliminar una de las dos o, en el caso de este bloque, presentar respuestas muchos más escuetas. Por ejemplo, esta respuesta:

“Si quieres mantener la protección y pagar menos por tu seguro de coche, tu aseguradora te puede hacer una oferta si contratas el resto de las pólizas con ellos. Agrupar el seguro de hogar, salud o vida con la póliza de coche te puede hacer ahorrar un dinero extra sin renunciar a ninguna garantía. También te aconsejamos ser realista con las coberturas que escoges para no estar pagando por una protección que no te hace falta y comparar entre las ofertas de las diferentes compañías. Para obtener un mejor precio, tienes que demostrar que asegurarte no supone un riesgo muy elevado. Una manera de minimizar el riesgo es que tu coche “duerma” en un garaje si tu situación personal lo permite.” (121 palabras)

se puede rebajar a este (ejemplo realizado usando ChatGPT Plus):

“Para ahorrar dinero en tu seguro de coche, agrupa tus pólizas con una misma aseguradora, elige coberturas realistas y compara entre compañías. También puedes minimizar el riesgo guardando el coche en un garaje y siendo un buen conductor. Algunas compañías ofrecen pólizas cuyo precio depende de tu estilo de conducción.” (50 palabras)

Per questo compito, però, anche Google Bard offre buoni risultati, con il punto positivo che presenta anche una breve spiegazione sul contesto in cui ciascun titolo potrebbe avere valore.

Provide a 500 words description for "adepta sororitas battle sisters squad" based on the description of the top ranked pages for "adepta sororitas battle sisters squad" without copying them, making the description unique, attractive, non-repetitive, relevant for a Warhammer 4K fan, and optimized to rank for "adepta sororitas battle sisters squad".

The Adepta Sororitas Battle Sisters Squad is a fierce and devout group of warriors who serve as the military arm of the Ecclesiarchy. These sisters of battle, also known as the Daughters of the Emperor, are uniquely placed as regular humans who are equipped with powerful armor and weaponry. They are dedicated to rooting out corruption and heresy within humanity and every organization, making them feared and revered by many.

The Battle Sisters Squad is comprised of highly trained and skilled warriors who are unwavering in their faith and loyalty to the Emperor. They are equipped with a wide array of weapons, including bolters, flamers, and melta guns, that they use to devastating effect on the battlefield. Their power armor, adorned with the symbols of the Emperor and the Ecclesiarchy, provides them with enhanced protection and mobility, allowing them to quickly move into position to engage the enemy.

In battle, the Battle Sisters Squad operates with a level of cohesion and discipline that is unmatched by many other factions in Warhammer 40,000. They work together seamlessly, using their individual skills and equipment to support each other and achieve their objectives. Their training and devotion to the Emperor give them an unshakable resolve that allows them to face even the most terrifying of foes without fear.

The Battle Sisters Squad is led by a Sister Superior, who is responsible for the training and discipline of the squad. This battle-hardened veteran is a skilled warrior and a devout servant of the Emperor, and she instills these qualities in her sisters through her leadership and example. Additionally, the squad may be supported by a variety of vehicles and auxiliary units, including Seraphim and Celestians, who provide additional firepower and support on the battlefield.

For those who are looking to add a Battle Sisters Squad to their Warhammer 40,000 army, there are a variety of options available. From the basic Battle Sister Squad to the elite Celestian Squad, there is a unit to suit every play style and strategy. Additionally, the models themselves are highly detailed and customizable, allowing players to create unique and personalized units that reflect their individual preferences and play styles.

Generazione di immagini:

Dall-E 2
Stable Diffusion
Midjourney

Per generazione di immagini fotorealistiche, l'ideale è usare Stable Diffusion o Midjourney nella sua versione 5.

In entrambi i casi, l'importante è l'uso dei pesi e dei parametri per evitare errori nella generazione dell'immagine.

0	Subject	a dog, a turtle, a woman, an elf
1	Film Type	Kodak Gold 400, Porta 400, Fujifilm's Pro 160C
2	Lighting	natural lighting, studio lighting, off-camera flash, overcast
3	Shot Type	closeup, low-angle, birds-eye view
4	Styling	Street style, Warhol style, anime, Picasso
5	Ambiance	misty, smokey, steamy, dreamy, spooky
6	Location	New York, Central Park, Ancient Egypt, Underwater
7	Fine Tuning	4k, fine grain, a (silly) dog, a (luxurious) necklace

Per generare buone immagini fotorealiste non ci può limitare a scrivere: "Un unicorno che vola su un arcobaleno".

Bisogna essere precisi, descrivere in dettaglio l'immagine che vogliamo generare e, soprattutto, indicare elementi come angolo, illuminazione, tipo di inquadratura, tipo di pellicola...
